- Safe, green and hospitable
- Easy to reach with a large number of direct flights

Co-organized by

Österreichische Gesellschaft für Public Health

All for Health – Health for All

The annual EPH Conferences are considered the premier European gathering of public health professionals worldwide. Delegates include researchers, policymakers, practitioners and teachers in public health and many other related fields.

The European Public Health Conference Foundation, the European Public Health Association (EUPHA) and the Austrian Public Health Association are pleased to invite you to the 9th EPH Conference from 9-12 November 2016 at the Austria Center in Vienna.

CAPACITY AND KNOWLEDGE BUILDING

The 9th EPH Conference offers excellent capacity and knowledge building by providing a packed scientific programme. The main theme for this conference 'All for Health – Health for All' highlights the importance of public health knowledge with the vision of overcoming spatial, social, cultural, professional or ideological boundaries. The main theme is complemented with sub-themes touching on every aspect and current affairs of public health and health care.

NETWORKING

The conference offers excellent opportunities for professional networking and for making and renewing friendships. Social events include a welcome reception, networking lunches and conference dinner.

VIENNA AND THE EPH CONFERENCE

To raise awareness in Vienna and to promote health, the conference plans to organise public engagement activities and the European Public Health Charity Run.

We promise that we will do our best to make the 9th EPH Conference in Vienna a most memorable scientific, social and cultural event.

We look forward to seeing you at Vienna 2016.

Thomas Dorner
Chair of Vienna 2016
