

Invitation

We cordially invite you to join us.

PREVENTING CHILDHOOD
OBESITY IN PRESCHOOLERS *together*
Putting successful models into
perspective in Europe

26. Sept.-28. Sept. 2018 Schloss Rif,
Paris Lodron-University of Salzburg

Do you know the Finnish city of Seinäjoki or EPODE in France? These projects have succeeded in significantly reducing the prevalence of overweight and obesity in children in their communities. Fortunately, there are now positive examples available in the specialist's world showing HOW we can enable a healthy growing up of children.

It is undisputed that everyone must act in concert in order to reduce children's obesity in the long term. Together with stakeholders from science, civil society and politics, we discuss how this collaboration can be achieved even better. Together we will exchange and improve our knowledge on putting action plans of WHO, the European Commission and national governments into practice and to facilitate a healthy lifestyle of children.

LOCATION

The entire event will take place at the castle Schloss Rif, venue of the Department of Sport Science & Kinesiology of the University of Salzburg, situated just 10 km from the city-centre of Salzburg and of the Berchtesgadener Land.

Pioneers Evening

Wed 26.9.2018

Press Conference

Pioneers of Health Promotion for Pre-Schoolers in Salzburg

Welcome Reception

International Symposium
